WOODSIDE REPORTS RECORD NET PROFIT of A\$1,084 MILLION

HIGHLIGHTS

- Underlying net profit after tax of A\$650.9 million was 23.6% higher than that of 2003.
- Underlying net profit after tax of A\$650.9 million was boosted by significant items to provide a
 record reported profit of A\$1083.6 million. Significant profit items were recorded for the sale of
 Enfield equity to Mitsui and of North West Shelf equity to CNOOC, which were only partially
 reduced by items related to the adoption of tax consolidation.
- Production of 56.2 million barrels of oil equivalent (MMboe) was lower by 0.5% compared to the 2004 production target of 56.5MMboe (as stated in Q3 2004).
- Net operating cash flow of A\$1318.1 million was 9.6% higher than 2003 (A\$1202.9 million).
- A final dividend of 32 cents per share fully franked will be paid, resulting in a total dividend for 2004 of 59 cents per share, fully franked (46 cents in 2003).

FINANCIAL RESULTS the results of the results are results and the results are results are results and the results are results.

Woodside's 2004 underlying net profit after tax of A\$650.9 million was 23.6% higher than the comparable underlying profit in 2003 largely due to higher product prices. The 2004 underlying net profit after tax provided a higher earnings per share of 97.6 cents compared to 79.0 cents per share in 2003.

The reported after tax profit provided a record earnings per share of 162.5 cents, significantly higher than the 79.0 cents per share of 2003.

The result was boosted by profits on significant items (post tax) from the sale of 40% equity in Enfield (WA-271-P, WA-28-L) of A\$431 million and the sale of North West Shelf equity to CNOOC of A\$73.5 million (Woodside share). These significant items were only partially reduced by A\$71.7 million due to the adoption of a tax consolidation regime.

The effective tax rate (excluding significant items) of 32.7% for 2004 was lower compared to 36.4% for 2003, mainly due to reductions in non-deductible foreign exploration expenditure.

A copy of Woodside's Financial Report and analyst presentation will be available on the company's web site (www.woodside.com.au) by 2:00pm (AEDT).

^{(1) 2003} production was recalculated to align with generally accepted industry practice whereby condensate and oil is reported on a volumetric basis of 1 barrel = 1 barrel of oil equivalent (2) n.m. = not meaningful

PRODUCTION and SALES

Start-up of the NWS Venture's LNG Train 4 and successful completion of the Legendre North-5H infill well made a positive contribution to Woodside's 2004 production of 56.2 MMboe, marginally lower (0.5%) than the target of 56.5 MMboe that was stated in Q3 2004.

Total production in 2004 was 7.4% lower than for 2003. However, if the adverse impact of the ongoing suspension of operations at BHP Billiton's Hot Briquetted Iron Plant (~1.9 MMboe) and the adjustment of the Ohanet Algerian Risk Sharing Contract barrels due to the high oil price environment (~1 MMboe) are excluded, the 2004 production would have been 59.05MMboe, just 2.7% lower than that of 2003 and 1.8% higher than the original 58MMboe target that was set at the start of 2004.

The revenue from oil and gas operations of A\$2158.6 million was up by 4.8% due to stronger product prices. The average Oil WTI price of US\$41.39 per barrel for 2004 was 33.6% higher than that of 2003 (US\$30.99 per barrel).

LIFTING COSTS

Gas lifting costs increased slightly by 3.7% to A\$66.4 million. The gas lifting cost per barrel of oil equivalent at A\$1.66/boe was marginally higher than that of last year (2003 A\$1.59/boe excluding Ohanet).

CONTRACTOR OF SECTION OF STANDING AND AND SECTION OF THE

Oil lifting costs decreased by 5.5% to A\$63.8 million mainly due to Laminaria production cost reductions and US\$ Legendre production costs benefiting from higher AUD/USD exchange rate. The unit cost/boe increased to A\$4.27/boe (2003 A\$3.44/boe) with a 23.8% decline in oil volumes outweighing the benefits of the cost reductions.

EXPLORATION

14 exploration wells were drilled during 2004 of which two were considered successful (Tevet, Midway) with commerciality yet to be advised for five other wells. 20 exploration wells were drilled in 2003.

The 2004 expensed exploration amount of A\$247.2 million was lower than the A\$281.9 million in 2003. The lower expense was largely a result of a lower overall exploration spend.

arth Mesa Shelf Verrane locus

ROYALTIES, EXCISE and PRRT CHARGES

Royalties and excise payments of A\$268.6 million were higher by 25.5%, primarily due to the Legendre field starting to pay excise in June 2004. Petroleum Resource Rent Tax (PRRT) of A\$47.5 million was 29% lower due to the lower Laminaria production.

US\$ DEBT UNCHANGED, GEARING LOWER

Interest bearing debt at the end of 2004 was US\$800 million in the form of three ten year US\$ bonds, unchanged from 2003. Gearing (net debt/net debt + equity) at the end of the year decreased to 8.5% compared with 26.8% at the end of 2003 largely due to the high cash balances on hand at the end of 2004. Cash balances reflect a year of high oil prices and include the proceeds of Woodside's divestments. Gearing is expected to increase as approved growth projects progress.

DEPRECIATION, AMORTISATION and RESTORATION

Depreciation, amortisation and restoration increased by 13.3% to A\$286.2 million mainly due to the reassessment of the useful life of specific offshore assets including the impact of the Goodwyn low pressure train project.

FULLY FRANKED DIVIDEND DECLARED

The Board has approved the payment of a final dividend of 32 cents per share (fully franked). In addition to the interim dividend of 27 cents per share (fully franked), a total dividend of 59 cents per share for 2004 was achieved, up from the 46 cents per share (fully franked) for 2003.

and the control of th

The dividend of 59 cents per share for 2004 represents a payout ratio of 60.4% on the underlying profit before significant items. In 2003, the comparative payout ratio was 58.2%. The final dividend of 32 cents per share will be paid on 23 March 2005 to shareholders registered on 3March 2005.

PROVED and PROBABLE RESERVES

New reserve bookings of 82:2 MMboe (Proved plus Probable) substantially exceeded annual production.

The three-year rolling average reserves replacement ratio⁽²⁾ (RRR) remains healthy at 144% (Proved plus Probable). Over the past six years reserves additions originating from Woodside's own exploration efforts have consistently provided a solid RRR of between 140% and 190%.

. . .

Section 1997 And Advanced Company of the Astron

(2) [RRR= the reserves change during the year, before deduction of production, divided by production during the year].

Reserves after divestments

Divestment of 124.2 MMboe (Enfield, NWS Venture) plus production and other changes resulted in final Proved plus Probable reserves of 1293.9 MMboe as at 31 December 2004, 9.7 MMboe lower than that of 2003. Proved Reserves were similarly affected by divestment of 95.0 MMboe, resulting in a closing balance of 950.2 MMboe, 29.6 MMboe lower than that of 2003.

2004 HIGHLIGHTS

- Record annual LNG production of 9.29mtpa (gross), up 14.2% over that of 2003, was achieved with the start-up of Train 4 in the second half of 2004. A record 156 LNG cargoes, 12.2% more than in 2003, were shipped by the venture.
- Record annual LNG and gas revenue of A\$729 million (up 3.1% from 2003).
- A 15 year milestone of reliable LNG supply to Japan was achieved by the North West Shelf Venture, delivering more than 1,600 LNG cargoes without missing a single delivery.
- A second trunkline from the offshore fields to the Karratha Onshore Gas Plant was completed, enhancing the North West Shelf supply capacity and operational reliability.
- A ninth LNG ship (Northwest Swan) was commissioned to service North West Shelf LNG shipping.
- LNG Train 4 was completed, lifting name-plate processing capacity of the Karratha gas processing plant by 56% to 41.7mtpa.
- **LNG marketing.** The North West Shelf Venture finalised sales and purchase agreements for LNG with Kansai Electric (0.5mtpa in 2009 to 2014, 0.925mtpa in 2015 to 2023) and Chubu Electric Power Company (0.6mtpa in 2009 over 15yrs).

- China LNG. The North West Shelf Venture formalised agreements to provide China with at least 3.3 million tonnes of LNG each year for 25 years. Under the agreements CNOOC receives around 5.3% equity in reserves sufficient to support the LNG supply plus the right to access (but not own equity in) the infrastructure that processes the gas to LNG.
- California LNG. Woodside (USA) Energy Inc. agreed in principle to develop the proposed Clearwater
 Port, LNG import terminal off California. Involvement in Clearwater Port represents a further step in
 Woodside's strategy of securing markets for its Australian gas reserves and assists California to secure
 a long-term, clean, and reliable energy source.
- Achieved 20-year milestone of NW Shelf domestic gas supply to Western Australia.
- Gas marketing. Gas sales agreements were signed with Western Power Corporation (up to 700PJ of North West Shelf gas), TXU Electricity Ltd (Woodside share up to 30PJ a year of Otway Thylacine-Geographe gas for more than 10 years) and Alcan Gove Pty Ltd (800PJ of Northern Territory Blacktip gas).
- Three major projects were approved for development at the Chinguetti oil, Thylacine-Geographe gas and Enfield oil fields. All are on track to contribute to production in 2006.
- Woodside realised early Enfield value and shared project risk by selling 40% of the project (contained in permits WA-271-P, WA-28-L) to Mitsui for US\$464.5M.
- Offshore Mauritania exploration drilling has yielded a discovery at Tevet while appraisal drilling on Tiof and development drilling at Chinguetti continued. The Chinguetti project is advancing within the expanded Phase I US\$625M budget and is on schedule for start-up by March 2006.
- Woodside's Mauritanian equity increased from 35% to 53.846% in February 2004 with the successful acquisition of Agip Mauritania BV. Agip's equity was pro-rate shared among Joint Venture parties. h November the Mauritanian Government exercised its right to participate in 12% of a defined area around the Chinguetti field, reducing Woodside's equity within this area to 47.383%.
- Ohanet production. The first full year of production from Woodside's 15% equity in the Algerian Ohanet project contributed to Woodside's condensate and LPG revenues.
- A new African country entry was secured in prospective deepwater exploration acreage in Sierra Leone. In Kenya, Woodside reduced its interests from 7 to 3 permits.
- In **Northern Iraq**, Woodside Energy (N.A.) signed a study agreement as a first step to evaluate potential opportunities to the east of the Kirkuk oil field.
- In the United States of America the Neptune oil field was successfully appraised with Neptune-7 and a small gas field was discovered at Midway.

 The provided Head of th

2005 OPERATING OBJECTIVES

• Efforts will continue to maximise production and to further reduce operating costs. Opportunities for infill drilling on our Australian oil fields will be pursued.

العالم المنظم المنط

- Assuming that BHPB's HBI plant remains shut-in for the full-year, cur 2005 production target is for a similar level to the production of 2004 (i.e. 56MMboe). Under normal circumstances the HBI plant would take around 3.6MMboe (Woodside share).
- As part of Woodside's "Investment in Growth", 5 to 7 projects are to be considered for final development approval in 2005 (i.e. Blacktip, Angel, Train 5, Neptune, Perseus-1B and possibly Stybarrow and Midway).
- LNG customers for Woodside's various gas projects will be pursued in the Asian and North American markets. Appraisal work on the Browse gas resource is planned.
- The African business unit activity will increase with development planning, appraisal drilling plus further exploration drilling in Mauritania, exploration drilling in Libya, Kenya and possibly the Canary Islands plus geological-geophysical activities in Mauritania, Libya, Algeria, Sierra Leone and Liberia.
- In early 2005, Woodside (operator 55%) successfully won four offshore exploration blocks in Libya's first open-bidding round. The five-year work program for the new Sirte Basin blocks includes 6,500km of 2-D and 1,000km of 3-D seismic plus four exploration wells. Previously in 2003 Woodside was awarded five onshore exploration blocks in the Sirte and one exploration block in the Murzuq Basins.
- Gulf of Mexico activity is expected to lift after forming an alliance with Explore Enterprise in early 2005.
- Our exploration program of 23 exploration wells in Australia, Africa and the Gulf of Mexico will seek to increase our long-term growth portfolio.

The Woodside Petroleum Ltd. Annual General Meeting will be held on Tuesday 19th April 2005.

DISCUSSION AND ANALYSIS OF THE STATEMENT OF FINANCIAL PERFORMANCE

and Control

16. 14.1 (14.1 ·)

Overview

Woodside's 2004 underlying financial performance increased by 23.6%, due principally to sustained high oil prices which more than offset lower oil volumes and unfavourable AUD/USD exchange rate movements. The 2004 reported results have also been impacted by three significant items namely the sale of a 40% interest in the Enfield permit/project, the conclusion of the China Equity sale and the adoption of tax consolidations (see Note 2).

	To change the control of the control of	2004 \$000	2003 \$000

Reported Net Profit/(Loss) After Tax	e jan ja	1,083,631	526,685

Issues that affected the Groups financial performance in the period were:

Revenue from oil and gas operations Lower sales volumes reduced revenue by \$218.4 million, resulting predominantly from natural field decline on the Laminaria and Legendre projects. Increased LNG sales due to the commencement of operations of the fourth LNG train were offset by lower Domestic Gas sales caused by the ongoing suspension of operations at the BHP Billiton HBI Plant. The average realised oil price in 2004 was US\$38.27 per barrel compared with US\$27.62 in 2003, increasing revenues by A\$529.1 million. Appreciation of the Australian dollar against the US dollar decreased revenue by A\$210.1 million with an average A\$/US\$ exchange rate in 2004 of 0.7360 compared with 0.6523 in 2003.

Cost of sales Production costs increased by \$59.5 million largely as a result of production taxes increasing by \$35.2 million with increased Legendre excise payments more than offsetting reduced Laminaria PRRT expense. Depreciation and amortisation increased by \$33.7 million including the reassessment of useful life of specific offshore assets including the impact of the Goodwyn low pressure train project.

Other revenues from ordinary activities Proceeds on the WA-271-P/Enfield sale and the China Equity sale contributed \$708.3 million. Other revenues decreased by \$12.0 million due to 2003 one-off sale of the Oil Search Ltd. investment and increased interest revenue in 2004 due to higher cash holdings.

Borrowing costs expensed Debt levels remained unchanged through the year, however, reductions in interest capitalised against construction projects have increased the net borrowing costs expensed in 2004.

Other expenses from ordinary activities The costs of assets sold for 2004 significant items is \$198.2 million. Other expenses have reduced by \$127.0 million. The main factors contributing to this decrease were a \$40.1 million reduction in exploration and evaluation expense and a reduction in foreign exchange losses of \$46.5 million.

Income Tax attributable to ordinary activities The effective tax rate, after eliminating significant items, has decreased to 33% in 2004 from 36% in 2003 mainly due to reductions in non deductible foreign exploration expenditure.

Key metrics

Return on equity (net profit attributable to the members of Woodside Petroleum Ltd. on total equity) increased from 21.6% to 34.2% due to the significant items incurred in 2004 (see note 2). Adjusting for significant items, return on equity decreased from 21.6% to 20.5%.

DISCUSSION AND ANALYSIS OF THE STATEMENT OF FINANCIAL POSITION

Overview

The Group's net assets increased by 30.3% to \$3,170.5 million over the year.

Issues that affected the Group's financial position in the period were:

Assets

- Cash \$554.6 million increase due to sustained operating cashflows from high oil prices and proceeds from WA-271-P/ Enfield sale and China Equity sale.
- Receivables The Greater Sunrise receivable was transferred from Non-Current to Current (received in January 2005).
- Other financial assets (Current and Non-Current) Deferred values on open hedges reduced by \$49.9 million after accounting for the increases in oil prices, the appreciation of the A\$/US\$ exchange rate and the lower level of hedging.
- Exploration and evaluation (E&E) Transfer of \$342.1 million of E&E to oil and gas properties with various projects achieving Final Investment Decision (Enfield, Chinguetti, Otway).
- Oil and gas properties Significant additions during the period include, Enfield \$246.7 million and Chinquetti \$142.4 plus \$342.1 E&E transferred to projects in development. Offsetting these additions was depreciation and amortisation of \$263.7 million.
- Other plant and equipment Reduction mainly due to sale of computer assets.
- Deferred tax assets Increase due to recognition of foreign tax loss assets in Mauritania.

Liabilities

- Interest bearing liabilities \$US debt remains at US\$800 million. A \$40.6 million reduction in the A\$ value of US\$ debt.due to the appreciation of the A\$/US\$ exchange rate.
- Provisions (Non-Current) Increased due to ongoing provision for restoration obligations of \$24.7 million.
- Other liabilities (Non-Current) Deferred exchange gain on US\$ borrowings increased by \$40.4 million.
- Deferred tax liabilities Primary impact arises from the entry into Australian tax consolidations regime.

Equity

The increase in equity arises from the reported profit for the financial year less the payment of dividends.

Key metrics

Gearing (net debt/net debt + equity) has decreased from 26.8% in 2003 to 8.5% in the current period. The company has substantial long term undrawn financing facilities totaling \$878.1 million and cash of \$732.2 million for any long or short term funding requirements.

and the second of the second o

Issues that affected the Group's cash flows in the period were:

Cash flows from operating activities

- Increased receipts from customers arise mainly due to the increase in revenues and trade debtor movements.
- Lower PRRT payments caused by lower Laminaria sales are more than offset by increased Legendre excise payments.

Cash flows used in investing activities

- sales and area Increased oil and gas property expenditure on a number of new projects (Enfield, Chinguetti, Otway) was partially offset by completion of previous projects (LNG Train 4, Second Trunkline, Ohanet). Exploration and evaluation expenditure reduced in 2004. FRANCISCO SE SE CONS
- The 2003 proceeds from sale of investments represent the proceeds on the sale of the investment in Oil म्बर्स है। हे जिस्सीर जैन्युम है जेन के लेन्स्य है जिस्सी है के अपने क्षेत्र है जिस्सी है जिस्सी है के जिस्सी Search Limited.
- Proceeds on sale of exploration and evaluation and oil and gas properties arise primarily from the WA-271-P (Enfield) and the China Equity transactions.
- Proceeds from the sale of other plant and equipment arises from sale of computer equipment.
- Payments for investments in controlled entities relates to the acquisition of AGIP Mauritania BV in January LANKS C.
- Payments for investments in other entities primarily relates to the take-up of Hardman Resources rights issue to maintain proportional equity investment.

1. PREPARATION OF CONCISE FINANCIAL REPORT

The Concise Financial Report has been prepared in accordance with the Corporations Act 2001, Accounting Standard AASB 1039 Concise Financial Reports and applicable Urgent Issues Group Consensus Views. The financial statements and specific disclosures required by AASB 1039 have been derived from the Group's Full Financial Report for the financial year. Other information included in the Concise Financial Report is consistent with the Group's Full Financial Report. The Concise Financial Report does not, and cannot be expected to, provide as full an understanding of the financial performance, financial position and financing and investing activities of the Economic Entity as the Full Financial Report.

The accounting policies are consistent with those of the previous year.

6. SEGMENT REPORTING

(a) Business Segments

The Group has the following reportable segments.

North West Shelf Business Unit

Exploration, evaluation, development, production and sales of LNG, Domgas, Condensate, LPG and Crude Oil from the North West Shelf Ventures.

Australia Business Unit

Exploration, evaluation, development, production and sale of crude oil, in assigned permit areas and from the Laminaria and Legendre, Exeter Mutineer, Enfield and Otway projects.

Africa Business Unit

Evaluation, development and production from the Algerian Ohanet project and Mauritanian Chinguetti development.

Group and Unallocated

This segment comprises the activities undertaken by all other business units and corporate costs.

(b) Geographical Segments

The Group's divisions operate in three main geographical segments. These segments are derived on the basis of revenue from oil and gas operations and the location of the customer providing that revenue.

Australia

The main operating activities of the entity, producing assets and a significant portion of sales are within Australia.

Asia

The majority of the entity's sales are made to customers within this region.

Africa

Revenues are received from the Algerian Ohanet project and include the development of the Mauritanian Chinguetti project.

Other

Exploration, evaluation and development activities in other areas. It also reflects sales to customers in the United States.

7. EVENTS SUBSEQUENT TO BALANCE DATE

Dividends

Since the reporting date, the Directors have declared a fully franked dividend of 32.0 cents (2003: 25.0 cents), payable on 23 March 2005. The amount of this dividend will be \$213,333,333 (2003: \$166,666,667). No provision has been made for this dividend in the financial report as the dividend was not declared or determined by the Directors on or before the end of the financial year.

Current Receivables

Deferred proceeds on the 2001 sale of a part interest in the Sunrise Gas project from Phillips STL Proprietary Limited of \$190,937,540 were received on 3 January 2005.

INDEPENDENT AUDIT REPORT ON CONCISE FINANCIAL REPORT

Independent audit report to members of Woodside Petroleum Ltd.

Scope

The concise financial report and directors' responsibility

The concise financial report comprises the statement of financial position, statement of financial performance, statement of cash flows and accompanying notes to the financial statements for the consolidated entity for the year ended 31 December 2004. The consolidated entity comprises both Woodside Petroleum Ltd. (the company) and the entities it controlled during the year.

The directors of the company are responsible for preparing a concise financial report that complies with Accounting Standard AASB 1039 "Concise Financial Reports", in accordance with the *Corporations Act 2001*. This includes responsibility for the maintenance of adequate accounting records and internal controls that are designed to prevent and detect fraud and error, and for the accounting policies and accounting estimates inherent in the concise financial report.

Audit approach

We conducted an independent audit on the concise financial report in order to express an opinion on it to the members of the company. Our audit was conducted in accordance with Australian Auditing Standards in order to provide reasonable assurance as to whether the concise financial report is free of material misstatement. The nature of an audit is influenced by factors such as the use of professional judgement, selective testing, the inherent limitations of internal control, and the availability of persuasive rather than conclusive evidence. Therefore, an audit cannot guarantee that all material misstatements have been detected.

We performed procedures to assess whether in all material respects the concise financial report is presented fairly in accordance with Accounting Standard AASB 1039 "Concise Financial Reports". We formed our audit opinion on the basis of these procedures, which included:

- testing that the information in the concise financial report is consistent with the full financial report, and
- examining, on a test basis, information to provide evidence supporting the amounts, discussion and analysis, and other disclosures in the concise financial report that were not directly derived from the full financial report.

We have also performed an independent audit of the full financial report of the company for the year ended 31 December 2004. Our audit report on the full financial report was signed on 16 February 2005, and was not subject to any qualification. For a better understanding of our approach to the audit of the full financial report, this report should be read in conjunction with our audit report on the full financial report.

Independence

We are independent of the company, and have met the independence requirements of Australian professional ethical pronouncements and the *Corporations Act 2001*. In addition to our audit of the full and concise financial reports, we were engaged to undertake the services disclosed in the notes to the financial statements of the full financial report. The provision of these services has not impaired our independence.

Audit opinion

In our opinion, the concise financial report of Woodside Petroleum Ltd. complies with Accounting Standard AASB 1039 "Concise Financial Reports".

Notes to and forming part of the Full Financial Report for the year ended 31 December 2004

1. BASIS OF PREPARATION OF FINANCIAL REPORT

(a) Basis of Accounting

The financial report is a general purpose financial report which has been prepared in accordance with the Corporations Act 2001 which includes Accounting Standards and Urgent Issues Group Consensus Views. Unless otherwise stated, the accounting policies adopted are consistent with those of the preceding year.

Section 1980 Cartinate

The financial report has been prepared in accordance with the historical cost accounting convention, except for hedge financial instruments which are measured on a fair value basis (also see Note 30(b)).

Where appropriate, figures for the financial year ended 31 December 2003 have been re-stated to make them comparable with amended classifications adopted for the financial year ended 31 December 2004.

2. CRITICAL ACCOUNTING POLICIES

The following accounting policies are critical to the reported financial performance and financial position of the group. For each policy a discussion of the intent and major implementation issues precedes the statement of policy.

and Market 1

(a) Joint Operations and a matrix to the second of the sec

Discussion

Within the oil and gas industry, it is common, in exploration and production ventures involving two or more participants, to conduct joint operations associated together in unincorporated joint ventures established by contract between them, usually known as joint operating agreements. Normally one participant is appointed as operator to manage joint operations, with the rights and obligations of individual participants equating their respective participating percentage interests in the venture.

An unincorporated joint venture allows its participants to more effectively manage individual risk and the individual incidence of taxation. It also gives participants a degree of flexibility on entering or exiting ventures, or otherwise dealing in or with their commercial interests.

The Group's statement of financial performance, statement of financial position and commercial obligations are recognised in a manner commensurate with its participating interest in each unincorporated joint venture in which it participates, whether as operator or otherwise.

Policy

The Group's interests in unincorporated joint venture operations are brought to account on a proportionate basis. Equity accounting has not been adopted for the joint venture entities that are integrated components of the North West Shelf joint ventures due to their immateriality.

The Group's interests in partnerships are brought to account by applying the equity accounting method and are written down to recoverable amount where this is less than their equity accounted carrying value.

Notes to and forming part of the Full Financial Report for the year ended 31 December 2004

7.75 - 10 - 5.00

2. CRITICAL ACCOUNTING POLICIES (Continued)

(b) Revenue

Discussion

Most of Woodside's oil and gas revenues come from a relatively small number of high value transactions. In these transactions, the point at which ownership of the oil or gas is transferred to the buyer is clear cut and the amount of revenue we receive is equally clear cut.

Company of the State of

\$ 1.5 miles

Charles A A Salar

法无行法 医结肠 医结节性乳头线体 不

the production of the first of

5 40 ods of

However, Woodside operates in some jurisdictions, such as Algeria and Mauritania, where the rules are different. In these cases, Woodside receives revenue according to formulae set out in its risk service or production sharing contracts. This means Woodside has an "economic entitlement" to production volumes, but not direct ownership as the oil or gas is owned and sold by the national oil company concerned.

Most of Woodside's oil and gas is sold in US\$ and is therefore subject to oil price and A\$/US\$ exchange rate fluctuations.

Revenues include the impact of hedging (see Note 2f).

Revenue from sources other than oil and gas sales generally relate to services and assets used in joint venture operations.

Policy

Revenue is recognised to the extent that it is probable that the economic benefits will flow to the Group and it can be reliably measured. Specific revenue recognition criteria include:

- Revenue is recognised when title to the product passes from the Group or when the right to receive payment is earned under risk service contracts;
- (ii) Gas revenue includes amounts sold under contracted 'take or pay' arrangements only when gas, which has been previously paid for, is drawn by the customer;
- (iii) Interest revenue is recognised on an effective yield basis;
- (iv) Revenue for services rendered (LNG ship charter and Management and other fees) is recognised as the right to receive compensation for the services is attained;
- (v) Dividend revenue is recognised upon attaining the right to receive;
- (vi) Proceeds on sale of assets are recognised when control of assets has passed to the buyer.

2. CRITICAL ACCOUNTING POLICIES (Continued)

(c) Exploration and Evaluation

Discussion

Woodside's accounting policy for the cost of exploring and of evaluating discoveries is based on the "successful efforts" approach of the US Generally Accepted Accounting Principles or US GAAP.

Constituents and a

100

Our approach is strongly linked to our oil and gas reserves determination and reporting process.

We believe this approach best reflects the results of our exploration and evaluation activity because only assets with demonstrable value are carried on the balance sheet.

When we decide to develop an oil or gas field, always signified by a final investment decision (FID), we transfer the accumulated exploration and evaluation costs for that field from "undeveloped" (Exploration and Evaluation) to "under development" (Oil and Gas Properties).

In this way, the costs of discovery and commercialisation of a field are represented in one place on the balance sheet.

So the part of the manager of the control of property and the control of the cont

mine the transplant completely was not with the base of the color of the factor of

<u>Policy</u>

Costs

Exploration and evaluation expenditure is accounted for in accordance with the area of interest method. Exploration licence acquisition costs relating to greenfields oil and gas exploration provinces are expensed as incurred while these costs incurred in relation to established or recognised oil and gas exploration provinces are initially capitalised and then amortised over the term of the licence.

was making a course of the other states of the

All other exploration and evaluation costs, including general permit activity, geological and geophysical costs and new venture activity costs are charged as expenses as incurred except where:

- the expenditure relates to an exploration discovery that, at balance date, has not been recognised as an area of interest as assessment of the existence or otherwise of economically recoverable reserves is not yet complete; or
- an area of interest is recognised, and it is expected that the expenditure will be recouped through successful exploitation of the area of interest, or alternatively, by its sale.

Each potential or recognised area of interest is reviewed at least bi-annually to determine whether economic quantities of reserves have been found or whether further exploration and evaluation work is underway or planned to support the continued carry forward of capitalised costs.

The costs of drilling exploration wells are initially capitalised pending the results of the well. Costs are expensed where the well does not result in the successful discovery of economically recoverable hydrocarbons and the recognition of an area of interest. Areas of interest are recognised at the field level. Subsequent to the recognition of an area of interest, all further costs relating to that area of interest are capitalised.

To the extent it is considered that the relevant expenditure will not be recovered it is written off.

<u>Discussion</u> The state of the

Costs

Woodside uses a well-established project management process, known as OPREP, to mature opportunities from identification to operation. The process provides clear decision points for determining the appropriate stage at which to start capitalising costs.

· 我就是这种一点自由人主教 \$P\$ 多种,我想到你就是一个

Oil and gas property costs include project capital expenditure, capitalised borrowing costs, transferred exploration and evaluation costs, and the cost of development wells. विकास के सम्बद्धित है। जो स्वर्धित के स्वर्धित के अपने के स्वर्धित है। से सामने के सामग्रीहरू के सुम्बन्धित के सामग्री के सम्बद्धित है।

Depreciation and Amortisation

of the contract of the

Same that the state of the same and the

Woodside uses the "units of production" (UOP) approach when depreciating and amortising field-specific assets. This approach covers about 60% of Woodside's oil and gas properties.

For the remainder of our assets, we use the "straight line" approach, the duration of which reflects the useful life of each asset.

in the transfer of the property and the For the "units of production" approach, our calculations are based on "proved plus probable reserves" as determined by our reserves determination and reporting process.

We use "proved plus probable reserves" because this is the basis on which we make decisions about developing and managing our projects, thus reflecting our expected use of these assets.

一、大大公司、Grand Company Company

Woodside uses "proved reserves" as a basis for "stress testing" project economics. However, because we expect to produce more than "proved" reserves when we develop a field, we believe it is inconsistent to use these reserves as the basis for depreciation: The containing regression to the containing the containing and the containing the containing and the containing

Woodside reports its hydrocarbon resource estimates using definitions and guidelines prepared by the Society of Petroleum Engineers Inc. and the World Petroleum Congresses. Woodside uses a ten-year average crude price for determining oil reserves and individual project contract terms for dry gas and condensate reserves.

Woodside's reserves determination and reporting process is described in the Reserves Statement in the Concise Annual Report.

Notes to and forming part of the Full Financial Report for the year ended 31 December 2004

2. CRITICAL ACCOUNTING POLICIES (Continued)

TORREST MERCHANIST CORP.

(d) Oil & Gas Properties (Continued)

<u>Policy</u>

Costs

Oil and gas properties are shown in the Statement of Financial Position at cost. The cost of qualifying assets include borrowing costs that would have been avoidable, but for the relevant capital programs. Borrowing costs are predominantly made up of interest costs.

Section of the Market Co.

Programme and the second

3/91/2015

Contain and Administration

Costs are initially incurred against Projects in Development and are transferred to Producing Projects upon commencement of commercial operations for large integrated projects or upon physical completion for standalone or incremental assets.

Profits or losses resulting from the disposal of oil and gas property assets are recognised in the Statement of Financial Performance.

Depreciation and Amortisation

Oil and gas properties, other than freehold land, are depreciated at rates based on the expected economic lives of the assets. The majority of plant and equipment is depreciated on the UOP basis. Transferred Exploration and Evaluation costs are amortised on the relevant UOP basis for each area of interest. The probable reserves used in these calculations are updated at least annually and are sourced from the same data used to prepare the annual Reserves Statement. Marine vessels and carriers are depreciated on a straight-line basis over their useful lives. The rates are reviewed periodically to reflect technical and economic developments.

(e) Recoverable Amount of Non Current Assets

्रमा । १४६ में जार सूरक्षेत्रे अवस्थान सम्बद्धान स्थान

Discussion

The carrying amounts of non current assets are reviewed bi-annually to assess for impairment. Recoverable amounts are assessed using relevant cash flows discounted to their present value.

Woodside does these tests at a summarised level for each oil and gas project, such as North West Shelf oil, North West Shelf gas and Laminaria oil, because of the integrated nature of operations within each project.

Our major assumptions in doing these tests are long-term commodity prices (contracted rates or 10-year rolling average crude oil prices) and long-term Australian dollar-US dollar exchange rates (based on long-term market forecasts).

Policy

The carrying amounts of non current assets are reviewed bi-annually, or when there is indication of an impairment loss, to determine whether they are in excess of their recoverable amount. If the carrying amount of a non current asset exceeds its recoverable amount the asset is written down to the lower value. In assessing the recoverable amount, the relevant cash flows have been discounted to their present value using market-based, pre-tax risk-adjusted rates.

The cost of providing interest free loans to employees under the Woodside Employee Share Plan affects Woodside's reported performance through increased employee benefit costs each period. Any costs arising from the limited-recourse component of the plan are recognised as an employee expense in the period that they are incurred. The option value to the employee of the limited-recourse nature of the Plan is not charged as an employee benefit expense. The costs to the company of providing the Share Plan benefit to employees is included in determining the remuneration of relevant employees as disclosed in the Group's Full Financial Report.

Notes to and forming part of the Full Financial Report for the year ended 31 December 2004

3. OTHER SIGNIFICANT ACCOUNTING POLICIES (Continued)

(n) Provisions (continued)

Contributions to the Group's superannuation plans by entities within the Group are charged against profit when due. The Group does not record excesses of fund assets over accrued membership benefits of the superannuation funds' defined benefits categories as an asset in the Financial Report.

Directors' retiring allowance

Provision is made for directors' retiring allowance accrued in accordance with the rules approved by shareholders. At the 2004 Annual General Meeting, shareholders approved the cessation of the accrual of directors' retiring allowance as from 30 April 2004. In accordance with the agreed rules, one director elected to have the accrued allowance indexed, the other directors chose to convert their accrued allowance to shares. The shares for the latter Directors have been purchased and are held in trust, creating effective defeascence of that liability.

直通性 医二型病 经多数

Income tax

Tax-effect accounting is applied using the liability method whereby income tax is regarded as an expense and is calculated on the accounting profit after allowing for permanent differences. To the extent timing differences occur between the time items are recognised in the accounts and when items are taken into account in determining taxable income, the net related taxation benefit or liability, calculated at rates applicable to the expected period of reversal, is disclosed as a future income tax benefit or a provision for deferred income tax. The net future income tax benefit relating to tax losses and timing differences is not carried forward as an asset unless the benefit is virtually certain of being realised.

Tax consolidations

Woodside Petroleum Ltd. is the head entity in the tax-consolidated group comprising only the Australian wholly-owned subsidiaries set out in note 43. The effective date of implementation was 1 January 2004 for the tax-consolidated group. The head entity recognises all of the current and deferred tax assets and liabilities of the tax-consolidated group (after elimination of intragroup transactions).

AND A STREET WAS COME OF MARKET WAS A STREET

The tax-consolidated group is entering into tax funding agreements that require Australian wholly-owned subsidiaries to make contributions to the head entity for deferred tax balances relating to Australian taxation obligations recognised by the head entity on implementation date. This includes the impact of any relevant reset tax cost bases.

The head entity has entered into a tax funding agreement with the members of the tax consolidation group. The tax funding agreement is effective from 1 January 2004. The agreement is aimed at achieving an allocation of the group's income tax expense to subsidiaries within the tax consolidated group as if they were operating on a stand-alone basis. The subsidiaries party to the agreement will reimburse the head entity for an amount calculated as if it were on a stand-alone basis. Similarly, the head entity will reimburse subsidiaries for losses when they are utilised to reduce group tax payable. The assets and liabilities arising under the tax funding agreement are recognised as intercompany assets and liabilities.

Non Australian tax assets and liabilities remain within the relevant subsidiaries.

Notes to and forming part of the Full Financial Report for the year ended 31 December 2004

4. IMPACT OF INTERNATIONAL FINANCIAL REPORTING STANDARDS ON WOODSIDE ACCOUNTING POLICIES

(a) Background

Australia, through the Financial Reporting Council and the Australian Accounting Standards Board, is amending Australian Accounting Standards to converge with International Financial Reporting Standards ("IFRS") effective 1 January 2005. Resulting standards are known as Australian equivalents to IFRS.

Woodside's IFRS Implementation Project was commenced in 2003 and regularly reports progress to the Board Audit and Risk Committee. The project is on schedule to provide IFRS compliant financial reports in 2005.

Effect of IFRS upon Woodside Financial Reporting

Woodside's future financial reporting will reflect IFRS impacts as follows:

-	Transition of systems and processes to enable IFRS compliant financial reporting.
March, June, September,	2005 quarterly ASX releases prepared under IFRS with 2004 comparatives restated for IFRS.
30 June 2005	2005 Half-Year Financial Report prepared under IFRS with comparatives for 30 June 2004 restated for IFRS.
•	2005 Annual Financial Report prepared under IFRS with comparatives for 31 December 2004 restated for IFRS.

The presentation of comparative information under IFRS for 2004 will differ to this financial report prepared under Australian Generally Accepted Accounting Principles ("A GAAP") at 31 December 2004. Detailed disclosure will be provided in both the 30 June and 31 December 2005 financial statements of adjustments required to align the 2004 comparative information with IFRS.

Project Milestones and Achievements

The following activities have been achieved by the project in implementing the requirements of IFRS within Woodside:

- Key differences presentation to Audit and Risk Committee;
- Detailed diagnostic review of Australian GAAP to IFRS;
- Decisions made on key accounting policies; and
- Identification and quantification of adjustments required to the opening transitional statement of financial position at 1 January 2004.

The current focus is now on finalising the implementation of revised accounting processes, procedures and required system changes.

Governance

The Project reports through the Chief Financial Officer. IFRS transition is a standing agenda item for the Board Audit and Risk Committee. The Project is supported by a management steering group and a group of financial reporting experts within Woodside. Woodside's external auditors have provided input into the process of interpreting the requirements and impacts of IFRS upon Woodside. Where necessary external advisors (separate from the external auditor) are being engaged to advise on specific matters.

Notes to and forming part of the Full Financial Report for the year ended 31 December 2004

4. IMPACT OF INTERNATIONAL FINANCIAL REPORTING STANDARDS ON WOODSIDE ACCOUNTING POLICIES (Continued)

(b) Summary

Adoption of IFRS will impact on Woodside's reported financial performance and financial position (as outlined below), however, Woodside's cashflows are unaffected by the transition. There is no impact from Woodside's loan covenants.

Whilst compliance with IFRS does not result in US GAAP compliance it does eliminate a significant number of differences, making Woodside's reported outcome more comparable to many international oil & gas industry peers.

CHANGE AND THE THE TENENT WAS ENGLISHED THE PROPERTY OF THE

Control of the property of property of the first of the

William Garage

(c) Key Differences

First time adoption impacts of IERS are effected through opening balance transitional entries.

The key differences between existing Australian GAAP and IFRS as they impact the Woodside Group are presented below. An indicative quantification is included, these have been determined by Woodside and represent current best estimates. Final interpretation of the new IFRS standards by standards setters and professional bodies continues to be finalised.

Exploration and Evaluation

Woodside's existing policy of accounting for exploration and evaluation activity through application of the successful efforts based approach complies with IFRS requirements and therefore no difference is expected to result either from the treatment of costs or from impairment testing.

Petroleum Resource Rent Tax (PRRT)

Under IFRS the Income Taxes standard extends the scope of tax effect accounting to encompass Petroleum Resource Rent Tax (PRRT). Woodside currently accounts for PRRT on an incurred liability basis. Under IFRS a deferred PRRT liability will be recognised for the differences that have accumulated between the PRRT tax base of assets and their accounting base. These differences arise from the earlier deductibility of expenditure for PRRT when compared to Woodside's successful efforts based accounting expense outcomes. These taxable temporary differences will reverse as each project generates PRRT assessable income. This change will result in each project's PRRT expense being higher in its initial periods and lower in the latter periods. The initial adoption will reduce opening retained earnings by approximately \$250 million. It is expected that there will be a decrease in current and near term PRRT expense with later impacts dependent upon the timing of new projects subject to PRRT.

Employee Share Plan

Applicable from 1 January 2005, Woodside's employee share plan will be treated as share based compensation. Under this approach the principal amount of the interest free, limited-recourse loans to acquire shares, worth \$137 million at 31/12/04, will be reclassified as a separate class of shareholders equity. In line with the share plan entitlements Share based compensation will be recognised over a 3 year vesting period. Dividends paid on shares the subject of such loans, to the extent they are retained to repay the bans, will be offset against that separate class of shareholder equity. In addition, for vested employee share plan benefits, Woodside will be required to recognise within the profit and loss the compensation expense measured at the fair value of the 'share option' inherent in the plan issued to employees. The increased expense from this accounting treatment is not expected to be material.

Notes to and forming part of the Full Financial Report for the year ended 31 December 2004

4. IMPACT OF INTERNATIONAL FINANCIAL REPORTING STANDARDS ON WOODSIDE ACCOUNTING POLICIES (Continued)

Leases

Under IFRS, contracts which include the provision of equipment must be analysed for embedded leases, with any leases accounted for in accordance with the Leasing standard. Review of Woodside's contracts has identified one agreement which is assessed as containing a finance lease and a number which contain operating leases. The initial adoption will in relation to the finance lease reduce opening retained earnings by approximately \$10 million. Future LNG shipping expenses will, over time, be lower by the same amount.

Functional and Presentation Currency

But the Burner of Butter of the Augustian

Woodside has determined that the functional currency of its major Australian operating subsidiaries for IFRS purposes will be Australian dollars. The majority of Woodside's foreign subsidiaries will have the US dollar as their functional currency as a reflection of their operating conditions. The presentation currency of the Group will continue to be Australian dollars.

The second property of the second property of the second property of the second property of

The impact on Woodside will be that the subsidiaries with a foreign currency as their functional currency will be translated into Australian dollars at each periods closing rate and any exchange movements will be recorded through a foreign currency translation reserve. The initial adoption will reduce opening retained earnings by approximately \$90 million, there will be no profit and loss impact of this change. Future impacts on net assets are dependent upon movements in the Australian to US dollar exchange rate. Also see the US Dollar Borrowings - Foreign Exchange Rate Translation Differences section below.

Woodside has elected to continue to capitalise interest on qualifying projects, however foreign exchange differences will now be expensed. Consequently, the carrying value of oil and gas properties will be reduced by approximately \$80 million due to the expensing to opening retained earnings of capitalised net foreign exchange losses reduced by applicable depreciation and amortisation. Future depreciation expense will, over time, be lower by the same amount.

Street in the Miles County of the Same of the

Provisions for Restoration 1988 1988 1988 1988 1988 1988

IFRS requires that the present value, at the commencement of a facilities operation, of restoration obligations be recognised as a non-current liability and the cost of future restoration be capitalised as part of the relevant project. The capitalised cost is amortised over the life of the project and the provision is accreted periodically as the discounting of the liability unwinds. The unwinding of the discount is recorded as interest expense. The initial adoption will increase opening retained earnings by approximately \$100 million. The impact on future restoration expense is expected to be immaterial.

Costs of Start-Up Activities

Under IFRS amounts of start up costs, pre-production costs and capitalised commissioning revenues, which were incurred up to 1985 and are currently being amortised under A GAAP are not eligible for capitalisation. The initial adoption will increase opening retained earnings by approximately \$20 million. Future depreciation expense will, over time, be higher by the same amount.

Notes to and forming part of the Full Financial Report for the year ended 31 December 2004

4. IMPACT OF INTERNATIONAL FINANCIAL REPORTING STANDARDS ON WOODSIDE ACCOUNTING POLICIES (Continued)

Financial Instruments

IFRS's applicable to financial instruments apply from 1 January 2005, meaning that the comparative period of 2004 is not required to be restated unlike the majority of other IFRS standards which require retrospective application.

Under IFRS all financial instruments have to be initially recognised at fair value. Subsequently, certain financial instruments including derivatives must be remeasured at fair value with movements in the fair value of derivatives taken to profit or loss unless detailed hedge accounting requirements are met. Woodside is changing processes to meet the requirements of hedge accounting where applicable.

Reported results may contain increased volatility depending upon the nature and extent of hedging and other financial instruments and market movements of valuation parameters such as commodity prices, foreign exchange and interest rates, produced as a supplied to the supplied of the su

SWINGS REPORTED A COMEDITION OF A

US Dollar Borrowings - Foreign Exchange Rate Translation Differences

THE REAL OF A STORY OF A STORY OF THE STORY OF A STORY

Control of the Commence of the

Under IFRS the US dollar borrowings have been assessed as not meeting the requirements for hedge accounting, due to the changed designation and effectiveness requirements. Therefore, as at 1 January, 2005 the amount then deferred as an exchange gain or loss on the US dollar debt will be taken to retained earnings. Subsequent to 1 January, 2005 the US dollar borrowings will be re-designated as hedges of net investments in Woodside subsidiaries with a US dollar functional currency. Exchange differences that arise on the designated amount will be recorded through a foreign currency translation reserve. The translation differences arising from US dollar borrowings that are not so designated will be recorded in the profit and loss. The initial adoption (at 1 January 2005) will increase opening retained earnings by approximately \$61 million. Subsequent financial impacts are dependent upon movements in the Australian to US dollar exchange rate.

Embedded Derivatives The Alexander and Alexander (Alexander State Control of the Alexander St

IFRS introduces from 1 January 2005 the concept of embedded derivatives and requires the identification, recognition and measurement of derivatives embedded within contracts that a company may enter. Embedded derivatives are required to be fair valued and movements reported in the profit and loss statement. In the review of existing contracts, to determine the extent of any embedded derivatives, two gas sales contracts have been identified as containing embedded derivatives the valuation of which recognises the long remaining term of these contracts. The initial adoption (at 1 January 2005) will increase opening retained earnings by approximately \$130 million. Future revenues will, over time, be lower by the same amount. Future changes in benchmark oil prices and the AUD/USD exchange rate will create volatility in these embedded derivatives.

Investments

Under IFRS investments in equity securities that have readily determinable fair values are classified as either Held for Trading or Available for Sale and carried at fair value. Unrealised gains or bases on investments Held for Trading are reported in profit and loss and for investments classified as Available for Sale are reported in shareholders' equity. Woodside's investments are expected to be classified as Available for Sale reflecting the intention to hold these investments rather than trade in them. Period impacts are dependent upon movements in the share price of investments. The initial adoption will increase shareholders equity by approximately \$50 million due to market prices being in excess of acquisition costs of listed investments.

Notes to and forming part of the Full Financial Report for the year ended 31 December 2004

4. IMPACT OF INTERNATIONAL FINANCIAL REPORTING STANDARDS ON WOODSIDE ACCOUNTING POLICIES (Continued)

Income Tax

Under IFRS, the balance sheet liability method is followed. The balance sheet liability method focuses on the tax effect of transactions and other events that affect amounts recognised in either the accounting balance sheet or the tax balance sheet. Arising from previous permanent differences the initial adoption will reduce opening retained earnings by approximately \$70 million. A tax benefit of approximately \$70 million arises from the other key differences outlined above. The total transitional impact on income tax is therefore approximately nil.

1000

Defined Benefit Superannuation Fund

温电设置 法

Woodside's employee compensation expense will need to recognise an actuarially determined "net periodic pension cost", for employees in the defined benefit category of the Woodside Superannuation Fund. Additionally the surplus or deficiency of the defined benefit plan will be recognised as an asset or liability in Woodside's balance sheet. Less than 25% of current employees are members of the defined benefit category, which at 31 December 2004 has a surplus of assets compared to accrued benefits. Transitional and future period impacts are expected to be immaterial.

Volatility introduced by IFRS Differences

Francisco (September 1988)

Company of the Section of the Section of

8-1-12

A STATE OF THE STA

State of the State

(4.40)

1.55

IFRS introduces various volatilities to Woodside's future reported financial performance and financial position. These are included in the discussion of individual items above. In summary the main effects include the effect of foreign exchange movements on USD debt not designated in a hedging relationship, movements in the value of currently identified embedded derivatives through movements in the AUD/USD exchange rate and in oil prices, movements in the value of defined benefit superannuation fund balances and movements in the value of listed investments.

payment of tax and dividends	697,988	531,080	697,988	8,131

On 1 January 2004, Woodside Petroleum Ltd. and its wholly owned Australian subsidiaries adopted the Tax Consolidation legislation which requires a tax consolidated group to keep a single franking account. The amount of franking credits available to shareholders of the parent entity (being the head entity in the tax consolidated group) disclosed at 31 December 2004, has been measured under the new legislation as those available from the tax consolidated group.

The comparative information has not been restated for this change in measurement. Had the comparative information been calculated on the new basis, the franking account balance after payment of dividends and tax as at 31 December 2003 for the parent company would have been \$531,080,000.

SUBSEQUENT EVENTS 28.

Dividends

Since the reporting date, the Directors have declared a fully franked dividend of 32 cents (2003: 25 cents), payable in March 2005. The amount of this dividend will be \$213,333,333 (2003: \$166,666,667). No provision has been made for this dividend in the financial report as the dividend was not declared or determined by the Directors on or before the end of the financial year.

Receivables

As indicated in Note 10, deferred proceeds on the 2001 sale of a part interest in the Sunrise Gas project from Phillips STL Proprietary Limited of \$190,937,540 were received on 3 January 2005

29. FINANCING FACILITIES (Continued)

Woodside Finance Limited, an entity controlled by Woodside Petroleum Ltd., is a party to US dollar and Australian dollar borrowings. A summary of each debt facility available at 31 December 2004 is presented below.

State of the state of the

and the state of the state of

Bi-Lateral Loan Facilities

The Group has eight, US\$50 million, five year term Bi-lateral Loan Facilities totalling US\$400 million. Two of these facilities are dual-currency. These facilities expire between 2005 and 2009 as follows, one in 2005, three in 2006, one in 2007, one in 2008 and two in 2009. Interest rates on each loan are floating based on LIBOR (or US dollar drawings) and are fixed at the commencement of the drawdown period. Interest is paid at the end of the drawdown period. The facilities are subject to a financial covenant and a negative pledge restricting the amount of future secured borrowings. Neither the covenant nor the negative pledge have been breached at any time during the reporting period. As at the balance date there was US\$nil (2003: US\$nil) outstanding under the facilities.

364-day Revolving Credit Facility

The Group has a dual-currency US\$50 million revolving credit facility. The interest rate is a floating rate based on the bank's cost of funds and is fixed at the commencement of the drawdown period. Interest is paid at the end of the drawdown period. The facility is subject to a financial covenant and a negative pledge restricting the amount of future secured borrowings. Neither the covenant nor the negative pledge have been breached at any time during the reporting period. As at the balance date there was US\$nil (2003: US\$nil) outstanding under the facility. The facility was extended for a further 364 days during the second half of 2004.

the graph of the contract of the contract of

Constitution of the Consti

Bonds.

The Group has a US\$300 million 10 year Unsecured Bond maturing in 2011 and two US\$250 million 10 year Unsecured Bonds maturing in 2008 and 2013 issued to 'qualified institutional buyers' in the United States as defined in Rule 144A under the US Securities Act. The 2008 US\$250 million Bonds have a fixed rate coupon of 6.6% and mature on 15 April 2008. The 2011 US\$300 million Bonds have a fixed rate coupon of 6.7% and mature on 1 August 2011. The 2013 US\$250 million Bond has a fixed rate coupon of 5.0% and mature on 15 November 2013. Interest on all Bonds is payable 6 monthly in arrears. The Bonds are subject to various covenants and a negative pledge restricting the amount of future secured borrowings. Neither the covenants nor the negative pledge have been breached at any time during the reporting period.

Commercial Paper, Medium Term Notes

A A COMPANY AND SAME ASSESSED.

The Group has an unsecured multi-currency A\$300 million Commercial Paper / Medium Term Note programme where drawdowns under the Commercial Paper programme can be for terms between 7 days to 364 days. Interest rates are floating based on BBSW (Australian Bank Bill Swap Rate) and are fixed at the commencement of each issue. As at the balance date there was no Commercial Paper outstanding (2003: A\$nil).

Carlot Andrews

Under the Medium Term Note facility, unsecured notes can be issued for terms of 365 days or more. The interest rate on the issue can be either fixed or floating and is subject to negotiation at the time of issuance. No Medium Term Note issuance has been made under this facility to date.

The Medium Term Note facility is subject to a negative pledge (for so long as any Medium Term Notes are outstanding) restricting the amount of future secured borrowings. The negative pledge has not been breached at any time during the reporting period.

Notice was given in December 2004 to terminate the Commercial Paper / Medium Term Note Programme and the cancellation will be effective in January 2005.

Notes to and forming part of the Full Financial Report for the year ended 31 December 2004

29. FINANCING FACILITIES (Continued)

Repayment obligations of the used amount of the facilities are as follows:

30. RISK MANAGEMENT / FINANCIAL INSTRUMENTS

(a) Hedging Position

In order to ensure that its cash flows will be sufficient to comply with corporate objectives, the Group may enter into financial transactions for the purpose of hedging and managing its exposure to commodity prices, foreign currencies and interest rates.

160 (18 Mg)

医海绵性神经 医性病 医性性 医抗球菌素 电线线 经线线 鞋上 医连虫属 经股份证券

(i) Commodity hedging

As at 31 December 2004, 0.06 million barrels of oil equivalent (MMboe) (2003: 2.7 MMboe) have been hedged with maturities out to January 2005 at a weighted average West Texas Intermediate price ("WTI") of US\$21.25/barrel (2003: US\$21.09/barrel).

Hedging can be undertaken against specific future oil price exposures only, by way of a number of financial instruments, including swaps, options and futures.

arte en l'Ariel a lighe d'en souteau se la l'arreil.

The state of the second of the

(ii) Currency hedging

As described in Note 2(f) the Group is Australian based; however, due to its industry segment of oil and gas it has significant US dollar cashflows. The exposure of these cashflows to fluctuation in the A\$/US\$ exchange rate is mitigated by US dollar cashflow offsets and by the currency hedge that exists due to the Group holding its external debt in US dollars. As at 31 December future revenues have been hedged using the US dollar external debt as follows:

	Revenues	US\$ Hedged	Period Hedged	Exchange Rate
2004	LNG	777.8 million	17-20 years	0.7355
2004	Condensate	6.8 million	5 years	0.6567
2003	LNG	765.0 million	18 years	0.7390
2003	Condensate	20.4 million	6 years	0.6567

Further specific currency hedging has been implemented as follows: As at 31 December 2004, US\$75.6 million (2003: US\$189.7 million) have been hedged with varying maturities out to two years at an average rate of A\$/US\$0.5341 (2003: A\$/US\$ 0.5496). Hedged US\$ revenues for the next two years are \$US67.1 and \$US8.5 million (2003: (three years) \$US 114.1, 67.1 and 8.5 million) with average rates of \$A/\$US 0.5397 and 0.4930 (2003: \$A/\$US 0.5605, 0.5397, and 0.4930).

Notes to and forming part of the Full Financial Report for the year ended 31 December 2004

Hedging can be undertaken against specific future commitments only, by way of a number of financial instruments, including forward exchange contracts, foreign exchange swaps and currency option contracts.

30. RISK MANAGEMENT / FINANCIAL INSTRUMENTS (Continued)

(a) Hedging Position (Continued)

(iii) Interest rate management

Borrowings of the compatible of the control of the control of the

1

As at 31 December 2004, US\$430million (2003: US\$425 million) was swapped from an average fixed rate of 5.68% to floating rates which average LIBOR + 1.56% (2003: LIBOR + 1.52%) with varying maturities out to nine years (2003: ten years). Hedges expire as follows, 2005: US\$180 million and 2013: US\$250 million.

Hedging can be undertaken against specific future interest rate exposures only, by way of a number of financial instruments including fixed-to-floating rate swaps, forward rate agreements and interest rate locks.

and a without an expectation and his mass pales so well as early and a single-

Money market deposits

The Group did not use any derivative contracts to hedge its money market deposits.

(b) Carrying Amounts and Estimated Fair Values of Financial Instruments

The carrying amounts and estimated fair values of the Group's financial assets and financial liabilities are as follows:

33. SHARE PLAN

32.

Under the Woodside Employee Share Plan, loans are made to employees to fund the on-market purchase of shares. The loans are interest free, have no stipulated repayment period, are limited-recourse and are repayable by application of dividends (after taking into account employee liability to tax on those dividends), the sales of shares or upon termination. All permanent employees are eligible to participate in the plan. The Company assesses incremental loan offer entitlements in accordance with pre-established criteria based on remuneration levels. Employee members receive all of the rights of normal ordinary shareholders including the rights to vote at meetings, receive dividends, and participate in bonus issues, rights issues and dividend reinvestment plans. Employees are eligible to take unrestricted possession of these shares at the earlier of three years from the date of issue or the date employment ceases, provided that the loan is repaid by proceeds of sale of the shares or other means. Where the loan is repaid by the sale of shares any remaining surplus on sale is paid to the employee while any shortfall is borne and expensed by Woodside.

and the contract of the particle of the contract of the contra

german francischer mit der met finde field in der gestellt geben der der

The number of shares acquired with each loan is a function of the weighted average price of Woodside Petroleum Ltd. shares on the Australian Stock Exchange (ASX) over the week prior to the acquisition date plus brokerage and stamp duty.

The number of shares that can be acquired under the plan is limited to 5.0% of issued ordinary share capital of Woodside Petroleum Limited and at 31 December the number of shares held by employees within the plan is 1.80%. (2003: 2.03%)

The outstanding loans range from \$0.50/share to \$19.69/share (2003: \$0.88/share to \$14.01/share). At 31 December 2004 the Woodside share price was \$20.10/share (2003: \$14.80). On this basis there was no shortfall between the market value of the shares and the loans owing (2003: Nil). Further information regarding the recoverability of the loan receivable is in Note 38 (c).

34. SUPERANNUATION

The Group sponsors the Woodside Superannuation Fund, of which membership is compulsory for all permanent and fixed term employees. The Fund has a defined benefit category (closed to new members from 1 July 1999) and an accumulation category.

The Group contributes to both categories. Members may make additional voluntary contributions. The Group's contributions are not legally enforceable other than those payable in terms of notified award and Superannuation Guarantee obligations.

Details of defined benefits as provided by the fund administrator are presented below. The assets of the fund were sufficient to satisfy all benefits that would have been vested in the event of termination of the fund and voluntary or compulsory termination of employment of each member.

(b) Remuneration Policy

The Board recognises that the Group's performance is dependent on the quality of its people. To achieve its financial and operating objectives, Woodside must be able to attract, retain and motivate highly skilled executives. Executive remuneration is reviewed annually having regard to individual and business performance against agreed targets set at the start of the year, relevant comparative information and internal and independent expert advice.

(c) Remuneration Structure

Woodside's remuneration structure for the CEO and senior executives is currently divided into three components:

■ fixed annual reward (FAR);

Contract Carlot

short-term incentives (STI); and

 $(\frac{1}{4}+1) + (\frac{1}{4}+1) + (\frac{1}{4}+1) + \frac{1}{4} + \frac{$

long-term incentives (LTI).

The variable components of an executive's remuneration for a given year are not finally determined and paid until the following year. The variable components of remuneration reported in this Report are therefore reported on a "lag" basis, and will relate to incentives which were earned in respect of the 2003 financial year but which were finally determined and paid in the 2004 financial year.

(i) Fixed annual reward (FAR)

The FAR component of executive remuneration comprises base salary, superannuation contribution and other allowances such as motor vehicle and health insurance. It is determined by the scope of each executive's role, their level of knowledge, skill and experience and individual performance.

Notes to and forming part of the Full Financial Report for the year ended 31 December 2004

35. DIRECTOR AND EXECUTIVE REMUNERATION (Continued)

(c) Remuneration Structure (Continued)

Woodside annually reviews, forecasts and benchmarks this component of executive remuneration against appropriate market comparisons using information and advice from external consultants.

A STANFACTOR TO STANFACTOR

espectable and travels

(ii) Short term incentive (STI)

The STI component of executive remuneration comprises an annual cash incentive which is linked to the performance of both Woodside and the individual executive.

Each year the Board sets a series of key performance indicators (KPIs) for the Group which are linked to the Company's business principles, budget and business plan. The degree to which these KPIs are achieved determines the size of the incentive pool available for distribution to all employees by way of a STI payment.

Amedian in the 1981 of the 1991

KPIs are agreed in the executives' performance agreements at the commencement of each year to ensure they meet specific business objectives for which the individual is responsible. The KPIs are aligned with Business Unit scorecards which are in turn aligned with the company KPIs that the Board sets on an annual basis. Performance agreements have a number of key focus areas which are both financial and non-financial. Examples of focus areas which are measured include increasing the value of our assets, producing more at a lower cost and advancing HSE performance.

The proportion of the STI incentive pool received by an individual executive is determined by the extent to which the individual has achieved his or her performance targets. The quantum of the incentive is determined by the Chief Executive Officer and recommended to the Human Resources and Compensation Committee for approval on the basis of demonstrated performance at the end of the performance year.

(iii) Long term incentive (LTI) processed to paper down the same and make

The LTI component of executive remuneration currently involves the provision to executives of an interest-free limited recourse loan which is used to purchase Woodside shares under the Woodside Employee Share Plan (WESP). The WESP is a broadly based employee share plan available to all Woodside employees. The WESP was last approved by shareholders in 1997. Participation in the WESP is at the discretion of the Board.

As shares acquired under the WESP do not vest in the executive for a period of three years after acquisition, this long term incentive component of remuneration is designed to:

- provide a direct link between Woodside's performance and the remuneration of executives; and
- encourage executives to improve company performance and consequently the value of Woodside shares

The value of the loans made available to an executive under the WESP are linked to the size and complexity of their role within Woodside, and is based on a percentage of their FAR (for Executives) or Base Salary (for employees). Loans provided under the WESP are reduced by a portion of the dividends paid on the shares acquired with those loans and have been topped up on an annual basis.

The Board believes the current LTI for executives is not best practice as there is not a clear enough relationship established between heir remuneration and performance. Hence the Board is making a recommendation to shareholders at the April 2005 Annual General Meeting to approve the implementation of a new Executive Incentive Plan (EIP). As part of the transition to the EIP, the grant of loans and the top up of loans to executives under the WESP ceased with effect from 30 June 2004.

35. DIRECTOR AND EXECUTIVE REMUNERATION (Continued)

Board.

(d) Executive Directors

At the date of this report the Chief Executive Officer, Mr Donald Voelte, is the only Executive Director on the Board.

Length of Contract Mr Voelte was appointed as Woodside's Chief Executive Officer with effect from 5 April 2004. Mr Voelte's employment contract with Woodside has a term of 4 years and 360 days. Under his employment contract Mr Voelte receives an annual salary, participation in Woodside's executive incentive schemes (subject to the matters described in more detail below) and the usual superannuation, health insurance and other benefits available to Woodside executives. Fixed Annual An initial Fixed Annual Reward of A\$1.35 million gross, subject to annual review. Reward Short Term A short term incentive component targeted to deliver an additional cash payment Incentive of between 25% and 62.5% of the Fixed Annual Reward, based on performance measured against criteria to be stipulated by the Board. Consistent with the other Executives, Mr Voelte for the 2004 performance year will have a cash incentive which is linked to the performance of Woodside and Mr Voelte. Assessment will

Long Term Incentive

A long-term incentive component targeted to deliver a long-term incentive award or payment with a base value as at the date of grant equivalent to 60% of the Fixed Annual Reward. The base LTI may be increased or reduced as determined by the Board in its discretion, depending on performance.

also be based on growing the value of the corporate portfolio, profit targets, the advancement of HSE performance, as well as specific objectives agreed with the

Mr Voelte's contract requires LTI to be provided under the Company's long-term incentive scheme. However, as the EIP has not yet been approved by shareholders and WESP is being phased out, the Board has determined that Mr Voelte's LTI for 2004 will be provided on the following basis:

- The 2004 LTI amount will be determined as above. This determination will be made by the Board following the assessment of Mr Voelte's performance for 2004.
- The 2004 LTI amount will be divided by \$15.95, being the price of a Woodside share as quoted by ASX at the commencement of trading on the date of commencement of Mr Voelte's contract, to determine a number of Woodside shares.
- Woodside will arrange (at its cost) for that number of Woodside shares to be acquired on-market on or as soon as possible after 15 April 2005, and held in trust for Mr Voelte. Mr Voelte will be entitled to voting and dividend rights on these shares but he will not be entitled to deal with or dispose of them until the earliest of:
 - the expiry of his contract of employment with Woodside;
 - 15 April 2015; or
 - the time when any person acquires a relevant interest in 50.1% of all Woodside shares.
- Mr Voelte's interest in the shares is subject to certain forfeiture conditions, including forfeiture in the event of dismissal for cause.

The cost to Woodside of acquiring the shares depends on the 2004 LTI amount and the acquisition price of the shares (which will not be known until after 15 April

Notes to and forming part of the Full Financial Report for the year ended 31 December 2004

2005). If the acquisition price exceeds \$15.95 the cost to Woodside will exceed the 2004 LTI amount. The cost will be disclosed in the Annual Report for the year ended 31 December 2005.

35. DIRECTOR AND EXECUTIVE REMUNERATION (Continued)

(d) Executive Directors (Continued)

Other benefits

Mr Voelte's employment in Australia may have adverse tax consequences for Mr Voelte and his wife in respect of his non-Australian income. Woodside has agreed to a limited "taxation equalisation" provision to compensate for this. Mr Voelte and his wife may claim reimbursement of tax paid or payable to the Australian Taxation Office for income or gain in relation to certain disclosed investments in the US to a maximum of US\$500,000 over the term of Mr Voelte's employment.

Woodside has also agreed to pay:

- the reasonable relocation costs for Mr Voelte and his wife from the US to Perth, Australia; and
- up to two business class round trip air tickets to the US for Mr Voelte and his wife in the first year of Mr Voelte's contract.

Resignation

In the event of resignation by Mr Voelte, Woodside may terminate Mr Voelte's employment before the notice period has expired and pay him an amount equal to a proportion of the Fixed Annual Reward, at the time at which notice is given, which corresponds to the remainder of the notice period which was not worked by Mr Voelte.

Termination

Mr Voelte's employment contract may be terminated by:

- expiry
- Mr Voelte, at any time during the term of the agreement on giving six months notice;
- Woodside, immediately in the event of serious misconduct or in other nominated circumstances;
- Woodside, at any time during the agreement term on giving written notice; and
- Mr Voelte's death.

On termination of the agreement for reasons outlined above, Mr Voelte (or his estate in the event of his death) will be entitled to:

- payment or award of any Fixed Annual Reward calculated up to the termination date;
- any annual leave entitlement accrued as at the termination date; and
- any payment or award under the cash incentive scheme or long-term incentive scheme calculated to the termination date.

If Woodside terminates Mr Voelte's employment during the term (other than on certain stipulated grounds such as misconduct), Mr Voelte will also be entitled to a termination payment equivalent to his Fixed Annual Reward, as at the termination date, calculated over a period which is the lesser of:

- 18 months; or
- if termination takes place in the final 18 months of the term, the balance of the period until the expiry of the term.

This payment is subject to statutory and regulatory requirements.

35. DIRECTOR AND EXECUTIVE REMUNERATION (Continued)

(d) Executive Directors (Continued)

Mr Voelte is restrained from certain activities for periods after termination of his employment in order to protect Woodside's interests. The employment contract also contains provisions for the protection of Woodside's interests in areas such as confidential information, intellectual property and moral rights.

(e) Specified Executives

This section contains information relating to the five Woodside Specified Executives (other than Executive Directors).

manage of the control of the control of the

Contractual terms for most executives are similar, however, do on occasions, vary to suit different needs. The details below describe the contractual terms for S Ollereamshaw (Shell expatriate secondee), K Spence, D Bailey, D Maxwell and A Kantsler.

Length of Contract	Open-ended for Mr Spence, Mr Kantsler and Mr Maxwell. Mr Ollereamshaw's secondment with Woodside ceases at 28 February 2005. Mr Bailey's contract ceased with effect 31 October 2004.
the Age to be a second	The same of the sa
Fixed Annual Reward	Consists of base salary, superannuation contribution and other allowances such as motor vehicle and health insurance.
Short Term Incentive	All except Mr Ollereamshaw are eligible to participate. Mr Ollereamshaw is eligible to participate in the Shell short term incentive plan.
Long Term Incentive	All except Mr Ollerearnshaw are eligible to participate. Mr Ollerearnshaw is eligible to participate in the Shell long term incentive plan.
Resignation	Employment may be terminated giving one month's written notice. For Mr Ollerearnshaw three months written notice is required.
Termination	Woodside may terminate the employment agreement by giving one month's written notice or payment in lieu of the notice period based on FAR. For Mr Ollereamshaw three months written notice is required.
Redundancy The control of the contr	If Woodside terminates employment of Mr Spence or Mr Maxwell due to redundancy, a severance payment will be made that is dependent on tenure of the Executive's employment with Woodside and their age. Currently this policy is capped at 104 weeks. For Mr Kantsler a severance payment will be made based on 52 weeks base salary. With the approval of a standard executive employment agreement redundancy payments will be equal to a maximum of 12 months FAR.
	Woodside may terminate the employment agreement at any time without notice, and the employee will only be entitled to FAR up to the date of termination.

In order to ensure consistency across executive employment contracts, the Human Resources and Compensation Committee has approved the implementation of a standard executive employment agreement (Executive Employment Agreement) for all of its senior executives, excluding the Chief Executive Officer.

35. DIRECTOR AND EXECUTIVE REMUNERATION (Continued)

(f) Non-executive Directors

Fees paid to non-executive Specified Directors of Woodside are based on advice from external remuneration consultants. This advice takes into consideration the level of fees paid to directors by other major Australian corporations, the size and complexity of Woodside's operations, its growing international dimensions, and the responsibilities and work requirements of Board members.

(i) Restructure of Non-executive Director Remuneration

At the 2004 Annual General Meeting shareholders approved a restructure of non-executive Directors' remuneration under which the accrual of retirement benefits (other than statutory superannuation) by non-executive Directors ceased at 30 April 2004. The accrued entitlements of non-executive Directors at 30 April 2004 will be carried forward to retirement and will be collected by non-executive Directors when they retire as either:

- a cash payment, being the entitlement accrued up to 30 April 2004, indexed to preserve its value by reference to the Average Weekly Ordinary Times Earnings figures published by the Australian Bureau of Statistics; or
- a number of Woodside shares, calculated by dividing the accrued entitlement amount by the average Woodside share price for the 5 trading days leading up to 30 April 2004.

Non-executive Directors were asked to choose between these alternatives. One Non-executive Director elected to receive a cash payment upon retirement. The remaining non-executive Directors chose to convert their accrued entitlement into Woodside shares.

(ii) Non-executive Director Remuneration

The state of the state of

Following the restructure described above, and with effect from 1 May 2004, non-executive Director remuneration now consists only of base fees, committee fees and superannuation contributions (or payments in lieu). Base fees may be adjusted to reflect special factors such as travelling time for overseas Directors. Fees payable to non-executive Directors are reviewed annually and fixed by the Board. Non-executive Directors are not entitled to incentive rewards for annual results or otherwise according to Woodside's performance.

Under the terms of the Non-Executive Directors' Share Plan (NEDSP), non-executive directors may elect to receive part of their remuneration in the shares of the company. These shares are acquired via on-market purchases.

Board fees are not paid to executive Directors since the responsibilities of Board membership are considered in determining the remuneration provided as part of their normal employment conditions.

(iii) Annual Board and Committee fees payable to non-executive Directors are as follows:

Position		,	Annual fee up to	Annual fee from

35. DIRECTOR AND EXECUTIVE REMUNERATION (Continued)

(f) Non-executive Directors (Continued)

In addition to these fees, non-executive Directors are entitled to:

- either a contribution to superannuation or an allowance equivalent to the superannuation guarantee levy (currently 9%), dependent on their personal circumstances and based on Board and committee fees; and
- all reasonable travel, accommodation and other expenses incurred in attending meetings of the Board, committees or shareholders or while engaged on Woodside business.

⁽c) Includes for Non-Executive Directors their election to convert the balance of their Directors Retiring Allowance to shares in Woodside.

Notes to and forming part of the Full Financial Report for the year ended 31 December 2004

Also see Note 33 for terms and conditions.

37. RELATED PARTY DISCLOSURES

(a) Other Transactions

Shell Energy Holdings Australia Limited is deemed a related party through its 34.27% interest (228,456,275 ordinary shares) in the shareholding of Woodside Petroleum Ltd. ("Woodside").

During the year petroleum products totalling \$9,021,000 (2003: \$6,520,000) were purchased from Shell Company of Australia by the Group in its own right or as operator of various joint ventures. These transactions were on normal commercial terms and conditions. At year end the liability outstanding to Shell in relation to these purchases was \$36,000 (2003: \$39,000).

During the year, the Group entered into a Condensate Sales Agreement with Shell Company of Australia in relation to the Otway gas/condensate project on normal terms and conditions. No sales under this agreement occurred during the period.

Shell Energy Holdings Australia Limited is a member of the Royal Dutch / Shell Group. Companies within the Royal Dutch / Shell Group provide the Group with various technical services, technology, research and information networks and secondment of management and technical staff. The cost of these various services to the Group was \$16,142,000 (2003: \$19,556,000). The Group sold \$55,202,000 (2003: \$319,884,000) of oil and gas products to members of the Royal Dutch / Shell Group on normal commercial terms and conditions. At year end the trade receivable outstanding in relation to these sales was \$116,000 (2003: \$13,181,000).

Shell and Woodside have common interests in joint ventures (refer Note 40).

 $\gamma = q_{(2)}$

The Group acquired no permit interests from any subsidiary of Shell during the year (2003: \$11,741,000).

(b) Transactions with related parties in the wholly owned group

and a section of present

Dividends, interest received/receivable and diminution in value of investments in subsidiaries are as per Note 5. Current amounts owing by controlled entities in Note 10 are inter-company current balances that attract interest at commercial rates. Non-current amounts owing by controlled entities in Note 10 are long term interest free inter-company advances. Non-current amounts owing to controlled entities in Note 22 are long term interest free inter-company advances.

CONTINGENT LIABILITIES 38.

- The Group has guarantees of \$1,300,000 (2003: \$4,000,000) in place in relation to workers' (a) compensation liabilities.
- (b) Woodside Petroleum Ltd., together with certain of its controlled entities have guaranteed the discharge by Woodside Finance Ltd. of its financial obligations under debt facilities mentioned in Note 29. See Note 43 regarding deed of cross guarantee.
- (c) In accordance with the terms and conditions of the employee share plan (see Note 33) loans to employees are limited-recourse. The Group is therefore potentially exposed to losses on termination of employees dependent upon the market value of the shares at that time. The value of the interestfree benefit and limited-recourse benefit attached to the loans has been recognised in the balance sheet as a deferred employee benefit expense (refer Note 13).

40. JOINT OPERATIONS (Continued)

(d) Details regarding joint venture entities related to joint venture operations include:

Entity	Principal activity	Carrying amount of investment \$000
North West Shelf Gas Pty. Limited	Marketing services for venturers in the sale of gas to domestic market.	\$2 only
North West Shelf Liaison Company Pty. Ltd.	Liaison for venturers in the sale of LNG to Japanese buyers.	23
North West Shelf Australia LNG Pty Ltd.	of LNG to international markets.	\$1 only
International Gas Transportation Company Limited	LNG vessel fleet management	22
North West Shelf Shipping Service Company Pty. Ltd.	LNG vessel fleet advisor	

These entities exist as integrated components of the overall North West Shelf Joint Ventures structure and are held proportionally with the other venturers. There have been no changes to the investment in these entities in the period. There are no material impacts of entity assets, liabilities, revenues, expenses or retained earnings upon the Woodside Group. All relevant commitments arising through these entities are included in disclosures in Note 31.

State of the state of

Notes to and forming part of the Full Financial Report for the year ended 31 December 2004

42. SEGMENT REPORTING

(a) Business Segments

The Group has the following reportable segments.

North West Shelf Ventures

Exploration, evaluation, development, production and sales of LNG, Domgas, Condensate, LPG and Crude Oil from the North West Shelf Ventures.

Australia Business Unit 🔞

Exploration, evaluation, development, production and sale of crude oil, in assigned permit areas and from the Laminaria and Legendre, Exeter Mutineer, Enfiled and Otway projects.

Africa Business Unit

Evaluation, development and production from the Algerian Ohanet project and Mauritanian Chinguetti development.

Group and Unallocated

This segment comprises the activities undertaken by all other business units and corporate costs.

(b) Geographical Segments

The Group's divisions operate in three main geographical segments. These segments are derived on the basis of revenue from oil and gas operations and the location of the customer providing that revenue.

Australia

The main operating activities of the entity, producing assets and a significant portion of sales are within Australia.

Asia

The majority of the entity's sales are made to customers within this region.

Africa

Revenues are received from the Algerian Ohanet project and include the development of the Mauritanian Chinquetti project.

Other

Exploration, evaluation and development activities in other areas. It also reflects sales to customers in the United States.

Notes to and forming part of the Full Financial Report for the year ended 31 December 2004

42. SEGMENT REPORTING (Continued)

Segment accounting policies
Segment accounting policies are the same as the consolidated entity's policies described in Notes 1, 2 and 3.

43. INTERESTS IN SUBSIDIARIES (Continued)

- (a) AGIP Mauritania B.V. (subsequently renamed WEL Mauritania B.V.) was acquired on 13 January 2004. Woodside West Africa Pty. Ltd. was incorporated on 24 August 2004, Woodside Liaison Company (Korea) Pty. Ltd. On 2 February 2004 and Woodside Energy Technologies Pty. Ltd. on 11 November 2004. During the year, Woodside Energy Ltd increased its interest in associate North West Utilities Pty. Ltd. from 46% to 86.5% and then the company was put into voluntary liquidation. Woodside Development Asia Pty. Ltd., Woodside Executive Superannuation Fund Pty. Ltd. and Woodside Financial Services Pty. Ltd. were deregistered during the year. Woodside Energy (North Africa) Inc. changed its name to Woodside Energy (Sahara) Inc. and Woodside Energy (Sierra Leone) Pty. Ltd. changed its name to Woodside Energy (SL) Pty. Ltd. during the year.
- (b) Pursuant to Class Order 98/1418, relief has been granted to controlled entity, Woodside Energy Ltd., from the Corporations Act 2001 requirements for preparation, audit and publication of accounts. As a condition of the Class Order, Woodside Petroleum Ltd. and Woodside Energy Ltd., are parties to a deed of cross guarantee. The effect of the deed is that Woodside Petroleum Ltd. has guaranteed to pay any deficiency in the event of winding up of Woodside Energy Ltd. Woodside Energy Ltd. has also given a similar guarantee in the event that Woodside Petroleum Ltd. is wound up.
- (c) The consolidated financial performance and Statement of Financial Position of the members of the Closed Group made up by the entities that are party to the Deed of Cross Guarantee as described in (b) above are as follows:

INDEPENDENT AUDIT REPORT

Independent audit report to members of Woodside Petroleum Ltd.

Scope

The financial report and directors' responsibility

The financial report comprises the statement of financial position, statement of financial performance, statement of cash flows, accompanying notes to the financial statements, and the directors' declaration for Woodside Petroleum Ltd (the company) and the consolidated entity, for the year ended 31 December 2004. The consolidated entity comprises both the company and the entities it controlled during that year.

The directors of the company are responsible for preparing a financial report that gives a true and fair view of the financial position and performance of the company and the consolidated entity, and that complies with Accounting Standards in Australia, in accordance with the *Corporations Act 2001*. This includes responsibility for the maintenance of adequate accounting records and internal controls that are designed to prevent and detect fraud and error, and for the accounting policies and accounting estimates inherent in the financial report.

Audit approach

We conducted an independent audit of the financial report in order to express an opinion on it to the members of the company. Our audit was conducted in accordance with Australian Auditing Standards in order to provide reasonable assurance as to whether the financial report is free of material misstatement. The nature of an audit is influenced by factors such as the use of professional judgement, selective testing, the inherent limitations of internal control, and the availability of persuasive rather than conclusive evidence. Therefore, an audit cannot guarantee that all material misstatements have been detected.

a da le na landra la gregia di saraba la la estidad <mark>ad Javier estid</mark>ad la Javiera de la compana de la compana de

We performed procedures to assess whether in all material respects the financial report presents fairly, in accordance with the *Corporations Act 2001*, including compliance with Accounting Standards in Australia, and other mandatory financial reporting requirements in Australia, a view which is consistent with our understanding of the company's and the consolidated entity's financial position, and of their performance as represented by the results of their operations and cash flows.

We formed our audit opinion on the basis of these procedures, which included:

- examining, on a test basis, information to provide evidence supporting the amounts and disclosures in the financial report, and which is a support of the financial report.
- assessing the appropriateness of the accounting policies and disclosures used and the reasonableness of significant accounting estimates made by the directors.

While we considered the effectiveness of management's internal controls over financial reporting when determining the nature and extent of our procedures, our audit was not designed to provide assurance on internal controls.

We performed procedures to assess whether the substance of business transactions was accurately reflected in the financial report. These and our other procedures did not include consideration or judgement of the appropriateness or reasonableness of the business plans or strategies adopted by the directors and management of the company.

Independence

We are independent of the company, and have met the independence requirements of Australian professional ethical pronouncements and the *Corporations Act 2001*.

Audit opinion

In our opinion, the financial report of Woodside Petroleum Ltd is in accordance with:

- (a) the Corporations Act 2001, including:
 - giving a true and fair view of the financial position of Woodside Petroleum Ltd and the consolidated entity at 31 December 2004 and of their performance for the year ended on that date; and
 - (ii) complying with Accounting Standards in Australia and the Corporations Regulations 2001; and
- (b) other mandatory financial reporting requirements in Australia.
